Subject: RE: CA - 11 Professional - Planning Submittal (Notice List & Site Visit)

Hi Matt,

See below for the conditions that will be included for the Use Permit tomorrow.

The site visit went great and I was able to get what I needed. The only issue that has come up is regarding the main monument sign, which as proposed is too large for approval. This is separate from the Use Permit hearing tomorrow and the Design Review, so it will not impact either approval. If the hearing does not run the whole hour tomorrow we can get on a separate call to discuss the sign, and I will send the specifics.

Conditions of Approval for UP21-025 (draft):

1. Applicant Responsible for Compliance with Conditions. The applicant shall ensure compliance with all of the following conditions, including submittal to the project planner of required approval signatures at the times specified. Failure to comply with any condition may result in construction being stopped, issuance of a citation, and/or modification or revocation of the Use Permit.

2. Plans and Representations Become Conditions. All information and representations whether oral or written, including the building techniques, materials, elevations and appearance of the project, as presented for approval on plans, dated **September 3, 2021** and on file with the Community Development Department, Planning Division, shall be the same as required for the issuance of a building permit, except as modified by these conditions of approval. Minor modifications or revisions to the project shall be subject to review and approval by Planning staff. Modifications deemed not minor by the Community Development Director may require review and approval as an amendment to the Environmental and Design Review Permit by Planning staff.

3. Subject to All Applicable Laws and Regulations. The approved use is subject to, and shall comply with, all applicable City Ordinances and laws and regulations of other governmental agencies. Prior to construction, the applicant shall identify and secure all applicable permits from the Building Division, Public Works Department and other affected City divisions and departments.

4. Permit Validity. This Permit shall become effective on **Monday, January 3, 2022** and shall be valid for a period of two (2) years from the date of final approval, or **January 3, 2024,** and shall become null and void if a building permit is not issued or a time extension granted by **January 3, 2024**. A permit for the construction of a building or structure is deemed exercised when a valid City building permit, if required, is issued, and construction has lawfully commenced. A permit for the use of a building or a property is exercised when, if required, a valid City business license has been issued, and the permitted use has commenced on the property.

5. This Use Permit (UP21-025) approves the operation of day care center for a maximum of 105 children ages six (6) weeks to six (6) years. It is estimated that there will be 18 full time employees. Should this proposed capacity change the Zoning Administrator will determine if the change can be approved at an administrative level or if a higher-level body review is necessary.

6. The Use Permit (UP21-025) is approved to operate Monday through Friday between 7:00 AM to 6:00 PM. Within that time children are expected to be dropped off between 7:30 AM to 10:00 AM, and be picked up between 12:00 PM to 12:30 PM, and 2:30 PM to 6:00 PM. Should these operating hours deviate, the Zoning Administrator will determine if the change can be approved at an administrative level or if a higher-level body review is necessary.

7. This permit is subject to review, imposition of additional conditions, or revocation if factual complaint is received by the Planning Division that the maintenance or operation of this establishment is violating any of these or other required conditions or is detrimental to the health, safety, peace, morals, comfort or general welfare of persons residing or working in the neighborhood or is detrimental or injurious to property and improvements in the neighborhood or to the general welfare of the City.

DIVISION 5.1 PLANNING AND DESIGN

SECTION 5.101 GENERAL

5.101.1 SCOPE
The provisions of this chapter outline planning, design and development methods that include environmentally responsible site selection, building design, building siting and development to protect, restore and enhance the environmental quality of the site and respect the integrity of adjacent properties.

SECTION 5.102 DEFINITIONS

5.102.1 DEFINITIONS
The following terms are defined in Chapter 2 *(and are included here for reference)*

CUTOFF LUMINAIRES. Luminaires whose light distribution is such that the candela per 1000 lamp lumens does not numerically exceed 25 (2.5 percent) at an angle of 90 degrees above nadir, and 100 (10 percent) at a vertical angle of 80 degrees above nadir. This applies to all lateral angles around the luminaire.

LOW-EMITTING AND FUEL EFFICIENT VEHICLES.
Eligible vehicles are limited to the following:

1. Zero emission vehicle (ZEV), including neighborhood electric vehicles (NEV), partial zero emission vehicle (PZEV), advanced technology PZEV (AT ZEV) or CNG fueled (original equipment manufacturer only) regulated under Health and Safety Code section 43800 and CCR, Title 13, Sections 1961 and 1962.
2. High-efficiency vehicles, regulated by U.S. EPA, bearing High-Occupancy Vehicle (HOV) car pool lane stickers issued by the Department of Motor Vehicles.

NEIGHBORHOOD ELECTRIC VEHICLE (NEV). A motor vehicle that meets the definition of "low-speed vehicle" either in Section 385.5 of the Vehicle Code or in 49CFR571.500 (as it existed on July 1, 2000), and is certified to zero-emission vehicle standards.

TENANT-OCCUPANTS. Building occupants who inhabit a building during its normal hours of operation as permanent occupants, such as employees, as distinguished from customers and other transient visitors.

VANPOOL VEHICLE. Eligible vehicles are limited to any motor vehicle, other than a motortruck or truck tractor, designed for carrying more than 10 but not more than 15 persons including the driver, which is maintained and used primarily for the nonprofit work-related transportation of adults for the purpose of ridesharing.

Note: Source: Vehicle Code, Division 1, Section 668

ZEV. Any vehicle certified to zero-emission standards.

SECTION 5.106 SITE DEVELOPMENT

5.106.1 STORM WATER POLLUTION PREVENTION FOR PROJECTS THAT DISTURB LESS THAN ONE ACRE OF LAND. Newly constructed projects and additions which disturb less than one acre of land, and are not part of a larger common plan of development or sale, shall prevent the pollution of storm water runoff from the construction activities through one or more of the following measures:

5.106.1.1 Local ordinance. Comply with a lawfully enacted storm water management and/or erosion control ordinance.

5.106.1.2 Best Management Practices (BMPs). Prevent the loss of soil through wind or water erosion by implementing an effective combination of erosion and sediment control and good housekeeping BMPs.

1. Soil loss BMPs that should be considered for implementation as appropriate for each project include, but are not limited to, the following:
   a. Scheduling construction activity during dry weather, when possible.
   b. Preservation of natural features, vegetation, soil, and buffers around surface waters.
   c. Drainage swales or lined ditches to control stormwater flow.
   d. Mulching or hydroseeding to stabilize disturbed soils.
   e. Erosion control to protect slopes.
   f. Protection of storm drain inlets (gravel bags or catch basin inserts).
   g. Perimeter sediment control (perimeter silt fence, fiber rolls).
   h. Sediment trap or sediment basin to retain sediment on site.
   i. Stabilized construction exits.
   j. Wind erosion control.
   k. Other soil loss BMPs acceptable to the enforcing agency.
2. Good housekeeping BMPs to manage construction equipment, materials, non-stormwater discharges and wastes that should be considered for implementation as appropriate for each project include, but are not limited to, the following:
   a. Dewatering activities.
   b. Material handling and waste management.
   c. Building materials stockpile management.
   d. Management of washout areas (concrete, paints, stucco, etc.).
   e. Control of vehicle/equipment fueling to contractor's staging area.
   f. Vehicle and equipment cleaning performed off site.
   g Spill prevention and control.
   h. Other housekeeping BMPs acceptable to the enforcing agency.

5.106.2 STORMWATER POLLUTION PREVENTION FOR PROJECTS THAT DISTURB ONE OR MORE ACRES OF LAND. Comply with all lawfully enacted stormwater discharge regulations for projects that (1) disturb one acre or more of land, or (2) disturb less than one acre of land but are part of a larger common plan of development sale.

Note: Projects that (1) disturb one acre or more of land, or (2) disturb less than one acre of land but are part of the larger common plan of development or sale must comply with the post-construction requirements detailed in the applicable National Pollutant Discharge Elimination System (NPDES) General permit for Stormwater Discharges Associated with Construction and Land Disturbance Activities issued by the State Water Resources Control Board or the Lahontan Regional Water Quality Control Board (for projects in the Lake Tahoe Hydrologic Unit).

The NPDES permits require postconstruction runoff (post-project hydrology) to match the preconstruction runoff (pre-project hydrology) with the installation of postconstruction stormwater management measures. The NPDES permits emphasize runoff reduction through on-site stormwater use, interception, evapotranspiration, and infiltration through nonstructural controls, such as Low Impact Development (LID) practices, and conversation design measures. Stormwater volume that cannot be addressed using nonstructural practices is required to be captured in structural practices and be approved by the enforcing agency.

Refer to the current applicable permits on the State Water Resources Control Board website at: www.waterboards.ca.gov/constructionstormwater. Consideration to the stormwater runoff management measures should be given during the initial design process for appropriate integration into site development.

5.106.4 BICYCLE PARKING. For buildings within the authority of California Building Standards Commission as specified in Section 103, comply with Section 5.106.4.1. For buildings within the authority of the Division of the State Architect pursuant to Section 105, comply with Section 5.106.4.2

5.106.4.1 Bicycle parking. [BSC-CG] Comply with Sections 5.106.4.1.1 and 5.106.4.1.2; or meet the applicable local ordinance, whichever is stricter.

2. For property lines that abut public walkways, bikeways, plazas and parking lots, the property line may be considered to be 5 feet beyond the actual property line for purpose of determining compliance with this section. For property lines that abut public roadways and public transit corridors, the property line may be considered to be the centerline of the public roadway or public transit corridor for the purpose of determining compliance with this section.

11 PROFESSIONAL CENTER PARKWAY

SAN RAFAEL, CALIFORNIA

APN 155-072-05

GENERAL NOTES:

1. The project applicant shall obtain a permit, if needed, to exceed the City's maximum allowable construction noise level of 90 dBA. The on-site complaint and enforcement manager shall have and be trained in the use of a sound meter and shall monitor construction noise to assure that levels do not exceed 90 dBA in the method prescribed by the San Rafael Noise Ordinance.
2. The hours of construction activity shall be limited to 7:00 a.m. to 6:00 p.m. Monday through Friday and 9:00 a.m. to 6:00 p.m. on Saturdays (interior only) in accordance with section 8.13.050 part A of the City's Noise Ordinance of the Municipal Code. Construction is not allowed on Saturdays, Sundays or holidays. The use of power tools shall be limited to 8:00 a.m. and 5:00 p.m. Monday through Friday.
3. To reduce daytime noise impacts due to construction, to the maximum feasible extent, the applicant shall develop a site-specific noise reduction program, subject to City review and approval, which includes the following measures:
   a) Signs shall be posted describing the permitted hours of construction in a conspicuous location near the property entrance legible from the edge of the roadway. The exact wording of the sign is prescribed by the City's Noise Ordinance.
   b) An on-site complaint and enforcement manager shall be designated to respond to and track complaints.
   c) A pre-construction meeting shall be held with the job inspectors and the general contractor/on-site project manager to confirm that noise mitigation and practices are completed prior to the issuance of a building permit (including construction hours, neighborhood notification, posted signs, etc.).
   d) Equipment and trucks used for project construction shall utilize the best available noise control techniques (e.g., improved mufflers, equipment redesign, use of intake silencers, ducts, engine enclosures, and acoustically attenuating shields or shrouds, wherever feasible).
   e) Impact tools (e.g., jack hammers, pavement breakers, and rock drills) used for project construction shall be hydraulically or electrically powered wherever possible to avoid noise associated with compressed-air exhaust from pneumatically powered tools. However, where use of pneumatic tools is unavoidable, an exhaust muffler on the compressed-air exhaust shall be used. Quieter procedures shall be used, such as drills rather than impact equipment, whenever feasible.
   f) Stationary noise sources shall be located as far from the adjacent residences as possible, and they shall be muffled and enclosed within temporary sheds, or insulation barriers or other measures shall be incorporated to the extent feasible.

GRADING NOTES:

1. The owner shall retain the Geotechnical Engineer of record to provide observation and testing of site grading.
2. Pavement subgrade, the Class II Aggregate Base, shall have a relative compaction of at least 95%.
3. Where paving subgrade is in existing fills or stockpiled material, all fills should be excavated to firm native soils, replaced as engineered fill and compacted to at least 95 percent relative compaction. The upper 12 inches of roadway subgrade should be compacted to 95 percent relative compaction per ASTM Test Designation D1557-91, to create a firm, smooth and essentially unyielding surface.
4. Where fills are placed to develop paving subgrade, any loose surface soils present at existing grade shall be scarified and compacted for their full depth prior to placement of additional fill.
5. All excess soil material, stumps, and boulders shall be removed and disposed of in accordance with City Building and Fire Department grading ordinance as they may apply.
6. All grading shall be performed in accordance with 2007 CBC, Appendix J, and as required by project Soils Report by Miller Pacific, dated, June 7, 2008. Soils engineer to be on site during excavation and compaction per soils report.
7. No work shall commence until the contractor, grading contractor and all related subcontractors have obtained a copy of the geotechnical investigation report for this project. Copies of this report are available at the developer's consultant, Monahan Pacific's office. All work shall be done in accordance with the recommendations of this referenced report and all subsequent geotechnical reports, investigations, tests and any other documents prepared by the geotechnical engineer and also in accordance with the grading instructions herein prepared by Adobe Associates, Inc. including Appendix J of the California Building Code.
8. Prior to any grading work shown on these plans, the contractor shall obtain a grading permit from the City of San Rafael Building Department.
9. In the event that archaeological features, such as concentrations of artifacts or culturally modified soil deposits including trash pits older than fifty years of age, are discovered at any time during grading, scraping, or excavation within the property, all work shall be halted in the vicinity of the find, the Planning Division shall be notified, and a qualified archaeologist shall be contacted immediately to make an evaluation. If warranted by the concentration of artifacts or soils deposits, further work in the discovery area shall be monitored by an archaeologist.
10. If human remains are encountered during grading and construction, all work shall stop in the immediate vicinity of the discovered remains and the County Coroner and a qualified archaeologist shall be notified immediately so that an evaluation can be performed. If the remains are deemed to be Native American and prehistoric, the Coroner shall contact the Native American Heritage Commission so that a "Most Likely Descendant" can be designated.
11. The owner shall have the Geotechnical Engineer of record observing all compaction and embankment work, including off-site construction.
12. Strippings to be used on the project as directed by the geotechnical engineer and the Landscape Architect.
13. All pads must be built to a tolerance of plus or minus 0.1 feet from planned pad elevation.
14. After the grading operation is well underway and it is apparent that strict conformance with the grading plan will not result in an earthwork balance, (import/export) the information for pad adjustment shall be taken into consideration after consulting with Adobe Associates, Inc. The contractor shall not deviate from the design elevations (with tolerance) without the approval of Adobe Associates, Inc. If import material is needed, it shall meet the requirements of the geotechnical report.
15. The Contractor shall perform earthwork calculations which account for his/her proposed methods of grading and trenching as he/she deems necessary for bidding and construction purposes. It shall be the sole responsibility of the contractor to balance the earthwork of this project and to account for the cost of any necessary importing or exporting of earth in his/her bid. No additional compensation shall be allowed for this item of work unless the owner requests additional work be performed.
16. Unsuitable material shall be off hauled to sites approved by the City of San Rafael or County of Marin.
17. Construction materials, equipment, vehicles, and debris boxes shall be placed to minimize obstruction of roads and gutters, shall be maintained in a clean and safe condition, and shall not be maintained in a manner that becomes a nuisance to the neighborhood. Debris Boxes in the City right-of-way will require an Encroachment Permit from the Department of Public Works.
18. The hours of construction activity shall be limited to 7:00 a.m. to 6:00 p.m. Monday through Friday and 9:00 a.m. to 6:00 p.m. on Saturdays (interior only) in accordance with section 8.13.050 part A of the City's Noise Ordinance of the Municipal Code. Construction is not allowed on Saturdays, Sundays or holidays. The use of power tools shall be limited to 8:00 a.m. and 5:00 p.m. Monday through Friday.
19. Dumping of residues from washing of painting tools, concrete trucks and pumps, rock, sand, dirt, agricultural waste, or any other materials discharged into the City storm drain system that is not composed entirely of storm water is prohibited. Liability for any such discharge shall be the responsibility of person(s) causing or responsible for the discharge.

CONSTRUCTION NOTES:

2. The location of existing underground utilities as shown on these plans, are based on the best information available; however, the City of San Rafael and Adobe Associates, Inc. assume no responsibility for the accuracy of the information shown, or for the inadvertent omission of any such information. The contractor shall cooperate with all utility companies and other contractors working within the limits of this project.
3. The contractor shall secure all Encroachment Permits from the City of San Rafael, and any other applicable agencies.
4. The contractor shall secure a Trench Permit from the California Division of Industrial Safety prior to excavation of any trench over five (5) feet in depth.
5. UNDERGROUND SERVICE ALERT (USA) call toll free 800-642-2444 at least 48 hours prior to any excavation.
6. Contractor shall coordinate undergrounding of all utilities such as cable TV, telephone, and electricity with the appropriate utility company.

8. All grading shall be performed in accordance with Appendix J, CBC Latest Edition, and as required by the Project Soils Report.
9. Only MMWD & City of San Rafael Utility personnel shall operate valves on existing water mains and water services.
10. There shall be no unmetered connections to the Public water system, including connections bypassing meter for testing onsite plumbing or for obtaining construction water. Such connections shall be severed by the Water Utility and will result in penalties including payment of fines and estimated water usage fees.
11. Service laterals other than those shown or noted on the plans shall not be installed prior to obtaining City approval.
12. Horizontal and Vertical reference points should be established by the contractor and checked frequently until the project is completed.

C EXISTING CONSTRUCTION NOTES

1. IN PREPARING THE PROJECT PLANS, THE SOURCE OF INFORMATION WAS BASED ON THE EXISTING BUILDING PLANS PREPARED BY ARCHITECT GEORGE GOODARD DATED MARCH 12, 1958 FOR THE ORIGINAL LARGE BUILDING, AND ARCHTECT JOCK MCKAY DATED APRIL 23, 1971 FOR THE TWO SMALLER ADDITIONS. THE CONTRACTOR SHALL VERIFY ALL EXISTING JOB CONDITIONS, REVIEW THE PLANS AND VERIFY ALL DIMENSIONS PRIOR TO CONSTRUCTION. THE CONTRACTOR SHALL NOTIFY THE ARCHITECT/ENGINEER OF ALL DISCREPANCIES AND EXCEPTIONS BEFORE PROCEEDING WITH ANY WORK. DRAWINGS FOR THE EXISTING CONSTRUCTION ARE AVAILABLE FOR REVIEW.
2. ALL WORK NOT INDICATED AS EXISTING (E) SHALL BE ASSUMED TO BE NEW (N).
3. ANY REMOVAL, CUTTING, DRILLING, ETC OF EXISTING WORK SHALL BE PERFORMED WITH GREAT CARE. SMALL TOOLS SHALL BE USED IN ORDER NOT TO JEOPARDIZE THE STRUCTURAL INTEGRITY OF THE STRUCTURE. IF STRUCTURAL MEMBERS OR MECHANICAL, ELECTRICAL, OR ARCHITECTURAL ELEMENTS NOT INDICATED FOR REMOVAL INTERFERE WITH THE NEW WORK, THE ARCHITECT/ENGINEER SHALL BE IMMEDIATELY NOTIFIED AND PRIOR APPROVAL SHALL BE OBTAINED BEFORE REMOVAL OF THE MEMBERS.
4. DO NOT OVER CUT EXISTING WOOD, CONCRETE, MASONRY OR OTHER WORK TO REMAIN. CUTS SHALL BE MADE NEATLY TO A CORNER, THEN ALTERNATE MEANS SHALL BE USED TO REMOVE REMAINING MATERIAL. CONTRACTOR IS RESPONSIBLE FOR REPAIR/REPLACEMENT OF OVER CUT MATERIAL AS DIRECTED BY THE ARCHITECT AND/OR ENGINEER.
5. EXISTING DAMAGED STRUCTURAL MEMBERS WHICH ARE UNCOVERED SHALL BE REPORTED TO THE ARCHITECT/ENGINEER FOR REVIEW AND REPAIR.
6. EXISTING CONCRETE SURFACE ABUTTING NEW CONCRETE SHALL BE ROUGHENED TO ¼" AMPLITUDE AND THOROUGHLY CLEANED OF DUST, LOOSE AGGREGATE, LAITANCE, ETC.
7. EXISTING REINFORCING AND/OR STEEL EMBEDS THAT ARE EXPOSED DURING DEMOLITION SHALL BE WIRE-BRUSHED AND FOREIGN MATERIAL REMOVED PRIOR TO PLACEMENT OF NEW CONCRETE.
8. REMODELING REQUIRES ASSUMPTIONS BE MADE REGARDING EXISTING CONDITIONS WHICH MAY NOT BE VERIFIABLE WITHOUT DESTROYING OTHERWISE ADEQUATE OR SERVICEABLE PORTIONS OF THE STRUCTURE. THIS ANALYSIS DOES NOT MAKE ANY GUARANTEE TO THE ADEQUACY OF THE STRUCTURAL DESIGN OF THE EXISTING BUILDING NOT SPECIFICALLY ADDRESSED IN THE STRUCTURAL CALCULATIONS. ZFA SHALL NOT BE RESPONSIBLE FOR UNSATISFACTORY PERFORMANCE OF EXISTING PORTIONS OF THE STRUCTURE NOT SPECIFICALLY ADDRESSED IN THE CONSTRUCTION DOCUMENTS.
9. DIFFERENTIAL SETTLEMENT BETWEEN NEW AND EXISTING CONSTRUCTION AT REMODEL OR ADDITION FOUNDATION INTERFACES CAN BE EXPECTED. ZFA SHALL NOT BE RESPONSIBLE FOR UNSATISFACTORY PERFORMANCE RESULTING FROM THESE CONDITIONS.

B. INSULATE ALL NEW AND EXISTING DOMESTIC COLD WATER PIPING.

(EITHER) EXPOSED OR CONCEALED) WITH 1/2" THICK ARMSTRONG 2000 OR ELASTOMERIC OR IMCOA POLYOLFIN FOAM PIPE INSULATION. ALL JOINTS SHALL BE SEALED WITH IMCOA ADHESIVE. ALL FITTINGS TO BE INSULATED WITH MITER CUT PIECES. WATER PIPES RUN IN EXTERIOR WALL CHASES ARE TO BE COVERED WITH 3/4" INSULATION.
FIBERGLASS INSULATION IS NOT ALLOWED.

C. PROVIDE INSULATION CONTINUOS THROUGH HANGERS AND ROLLERS.

D. INSULATE THE TAIL PIECE, "P" TRAP, TRAP ARM AND HOT WATER SUPPLY PIPING AT EACH FIXTURE FOR HANDICAPPED USE. HANDI LAV-GUARD INSULATION KITS. MANUFACTURED BY TRUEBRO INC.

20. PIPE WRAPPING

SPIRALLY WRAP ALL UNDERGROUND STEEL AND COPPER PIPING WITH PLASTIC TAPE ONE HALF LAPPED TO GIVE DOUBLE THICKNESS. WRAPALL FIELD JOINTS AFTER PRESSURE TEST. WHERE SOIL IS CORROSIVE ATTACH ANODES TO ALL UNDERGROUND STEEL PIPING WITH ISOLATION UNIONS IN ACCORDANCE WITH RECOMMENDATIONS OF A CORROSION ENGINEERS.

21. SLEEVES AND ESCUTCHEONS

A. PROVIDE SLEEVES FOR EACH PIPE PASSING THROUGH WALLS, PARTITIONS, FLOORS, ROOFS, AND CEILINGS. FOR CONCRETE CONSTRUCTION SET PIPE SLEEVES IN PLACE BEFORE CONCRETE IS POURED.

B. FOR UN INSULATED PIPE, PROVIDE SLEEVES TWO PIPE SIZES LARGER THAN THE PIPE PASSING THROUGH, OR PROVIDE A MINIMUM OF 1/2" CLEARANCE BETWEEN INSIDE AND OUTSIDE OF THE PIPE.

C. FOR INSULATED PIPE, PROVIDE SLEEVES OF ADEQUATE SIZE TO ACCOMMODATE THE FULL THICKNESS OF PIPE COVERING, WITH CLEARANCE FOR PACKING AND CALKING.

D. CALK THE SPACE BETWEEN SLEEVES AND PIPE COVERING, USING A NON COMBUSTIBLE, PERMANENTLY PLASTIC, WATERPROOF, NON-STAINING COMPOUND WHICH LEAVES A SMOOTH FINISHED APPEARANCE, OR PACK WITH NON COMBUSTIBLE ASBESTOS COTTON ROPE TO WITHIN 1/2" OF BOTH WALL FACES, AND PROVIDE THE WATERPROOF COMPOUND DESCRIBED ABOVE.

E. FINISHED AND ESCUTCHEONS:

1. SMOOTH UP ROUGH EDGES AROUND SLEEVES WITH PLASTER OR SPACKLING COMPOUND.

2. PROVIDE 1" WIDE CHROME OR NICKEL PLATED ESCUTCHEONS HELD IN PLACE WITH SET SCREW FOR ALL PIPES EXPOSED TO VIEW IN FINISHED SPACES.

22. CLEANOUTS

A. PROVIDE CLEAN OUTS OF SAME NOMINAL SIZE AS THE PIPES THEY SERVE, EXCEPT WHERE CLEAN OUTS ARE REQUIRED IN PIPES 4" AND LARGER PROVIDE 4" CLEANOUTS.

B. MAKE CLEAN OUTS ACCESSIBLE. AFTER PRESSURE TESTS ARE MADE AND APPROVED, THOROUGHLY GRAPHITE THE CLEAN OUT THREADS.

23. TAGGING AND IDENTIFICATION

LABEL ALL VALVES WITH SECURELY ATTACHED METAL TAGS SHOWING THE SERVICE AND VALVE NUMBER. STAMP TAGS WITH BLACK FILLED NUMBERS AND LETTERS. PRIOR TO FINAL INSPECTION, SUBMIT TO ARCHITECT TWO COPIES OF CHART. SHOWING VALVE NUMBER, SERVICE, VALVE LOCATION AND AREA CONTROLLED.

24. TESTING

A. TEST ALL WORK UNDER THE SUPERVISION OF THE REPRESENTATIVE OF THE ARCHITECT AND/OR OWNER AND INSPECTED BY ALL AUTHORITIES HAVING JURISDICTION OVER THIS WORK. DELIVER FOUR (4) SETS OF ALL TEST AND REPORTS TO THE ARCHITECT.

B. PRESSURE TESTS:

TEST THE VARIOUS PARTS OF THE SYSTEMS BEFORE PIPING IS CONCEALED AS REQUIRED BY GOVERNING AUTHORITIES AND PAY ALL COSTS FOR SAME.

1. ENTIRE SOIL, WASTE AND VENT PIPING SHALL BE TESTED WITH MINIMUM OF 10 FEET HEAD OF WATER THREE (3) HOURS.

2. ALL DOMESTIC WATER PIPING SHALL BE TESTED UNDER A HYDROSTATIC PRESSURE OF 150 PSI FOR THREE (3) HOURS.

C. OPERATING TESTS:

1. BEFORE FINAL ACCEPTANCE, PERFORM OPERATING TEST FOR A DURATION OF EIGHT HOURS. FURNISH ALL LABOR AND INSTRUMENTS FOR TEST.

D. SHOULD THE CONTRACTOR REFUSE OR NEGLECT TO MAKE ANY TEST NECESSARY TO SATISFY THE OWNER, OR HIS REPRESENTATIVE, THAT HE HAS CARRIED OUT THE TRUE INTENT AND MEANING OF THE SPECIFICATIONS, THE OWNER MAY MAKE SUCH TEST AND CHARGE THE EXPENSE THERE OF TO THE CONTRACTOR.

25. CLEANING

A. THOROUGHLY CLEAN ALL EQUIPMENT AND PIPING TO REMOVE DUST, SCALE, PLASTER, OR ANY INTERNAL OBSTRUCTIONS BEFORE ANY COVERING IS INSTALLED OR ANY PIPING, OR EQUIPMENT IS PAINTED AND/OR PLACED IN OPERATION. CLEAN EXPOSED PARTS OF EQUIPMENT, REMOVE OIL AND GREASE, AND LEAVE THE BRIGHT METAL PARTS CLEAN AND POLISHED. RESTORE FINISHED SURFACES IF DAMAGED, AND DELIVER ENTIRE INSTALLATION IN APPROVED CONDITION.
